Introduction

Welcome to greenscircle.com/. We are contracting & Construction Specialized company located in three different countries, Saudi Arabia, UAE & United States of America. You are at the right place to explore the adequate Renewable Energy, Civil, Mechanical, Electrical, MEP, IT & Computer Networking, CCTV, Cyber Security, Operation & Maintenance services you need and have a big picture of the splendid serves we offer.

At Green Circle, we envision a durable and bright future!

About Us

Green Circle is a registered company in the United Arab Emirates (UAE) & Kingdom Saudi Arabia (KSA) & United States of America (USA), The Head Office is located in Dubai UAE, branch in KSA Riyadh & USA so we can deliver a more convenient service to our clients across the UAE, KSA & USA. The organization was established and in full operation Since 2019. After a couple of years, we have proven our position in the market in the eld of interior, adequate Renewable Energy, Civil, Mechanical, Electrical, MEP, IT & Computer Networking, CCTV, Cyber Security, Operation & Maintenance Services.

Managing Director Message

Our vision and commitment to delivering quality products and services is fundamental to how we approach our projects and has significantly contributed to the growth of our business. We clearly recognize that our success has been achieved through the outstanding contribution from every member of our professional, experienced and motivated Team. We are determined to drive the expansion and diversity of our services to provide a truly comprehensive offering to our clients. Green Circle Contracting Company is committed to provide our clients with the highest level of service on all current and future works and we look forward to working with you.

Our mission

At Green Circle, our motto is to be the industry's top-notch Renewable Energy, Civil Works, Mechanical Works, MEP, Operation & Maintenance, Computer Networking, CCTV & Cyber Security provider with the help of our cutting-edge technology, implemented by our professional and expert team. We happen to be the unique source of trust, reliance and affordability for our client's all services need expectations and obligations. We have zero harm HSE Policy & High Degree of Client Satisfaction & Quality policy.

Our Vision

Excellence is our trademark. We nurture a balanced work environment for our employees with ethical values that promotes value for our clients and facilitate the growth of our business. We leave no stone unturned to improve our workforce quality of life.

Our Core Value

At Greens Circle, we focus on our un-compromised core values, i.e., Safety, quality, Commitment, dedication, transparency and professionalism. We value the highest level of our client satisfaction, that we believe is the key for customer growth and retention.

Our Commitment:

Quality Assurance:

we offer comprehensive Quality Assurance (QA) services to ensure the safety and reliability of our fire alarm and firefighting systems.

Safety Standards:

- Adhering to strict safety regulations, we prioritize the well-being of our clients and staff in every project.

Website: www.greenscircle.com Email: info@greenscircle.com Contact: +966594107307

- Safety is our primary concern. That's why we have a companywide goal of Zero injuries and accidents on every job we perform. Through constant reiteration of our safety procedures, immediate response to all unsafe acts, and positive reinforcement of safe behavior, we have been highly successful in reduction of higher-risk activities. Our Safety Record works for you with a reduction in our E.M.R. and lowered insurance costs, a savings which we pass on to the customer, as well as personal comfort of finishing each day accident free.

Customer Satisfaction:

customer satisfaction is at the core of our mission. We are committed to ensuring that our clients receive top-notch service and feel valued throughout their experience with us

Customer-Centric Approach:

- We believe in building lasting relationships with our clients.
- Our team listens actively to customer feedback and adapts accordingly.
- We aim to exceed expectations, not just meet them.

Transparency and Communication:

- Clear communication is vital. We keep our clients informed at every step.
- We address concerns promptly and transparently.

Employee Satisfaction:

- Happy employees lead to satisfied customers. We invest in our team's well-being.
- Our employees are trained to prioritize customer needs.

Green Circle Team

Message: Excellence is our trademark. We nurture a balanced work environment for our employees with ethical values that promotes value for our clients and facilitate the growth of our business. We leave no stone unturned to improve our workforce quality of life.

Syed Mehraban

CEO Greens Circle

Message: At Greens Circle, our motto is to be the industry's top-notch electrical service provider with the help of our cutting-edge technology, implemented by our professional and expert team. We happen to be the unique source of trust, reliance and affordability for our client's electrical needs and obligations.

Our Business Domains

Renewable Energy

With the spike in demand for electricity and growing focus on decarbonized solutions, a granular understanding of the power sector and power resources is critical to assessing business cases for new and existing assets. The global renewable energy industry faces extreme highs and lows, with record activity levels in key hotspots like China, South America, and Europe. While cost inflation and supply chain constraints are challenging project economics, key policies are being implemented around the world to address these trends.

At **Green Circle**, we are at the forefront of the renewable energy revolution. Our mission is to harness the earth's most abundant and sustainable resources to power a cleaner, greener future.

With our renewable energy consulting, you will gain the best renewables and power market intelligence, which is both detailed and timely. Offering global and local data, our Renewables & Power Solution comprises a power asset database that enables you to analyze the power generation industry, long-term trends in power supply and demand, installed capacity, fuel demand, and emissions.

Our solution allows you to deep dive into the different parts of the supply chain by analyzing manufacturing capacities for key projects components. It also helps you understand the economic details of renewable power with a breakdown of costs at an asset level.

The service covers the entire spectrum of power resources, solar, wind, hydro, geothermal, bioenergy, nuclear, gas, coal, liquids, and energy storage systems.

PV IPP

The world is at a critical juncture, facing multiple challenges such as climate change, rising energy demands, and the depletion of finite fossil fuel resources. In such a scenario, solar energy emerges as a beacon of hope and a key solution to address these pressing issues. Solar power offers numerous benefits, making it a vital part of our energy mix both now and in the future. In this blog post, we will delve into the reasons why solar energy is important and how it can shape a sustainable future.

we are a beacon of innovation in the realm of renewable energy. Our journey began with a vision to illuminate lives with the power of the sun. Today, we stand tall as pioneers in the design, development, and deployment of cutting-edge solar technologies.

Our Expertise:

Project Execution:

- From concept to completion, we navigate the intricacies of solar project development with precision and care.

Website: www.greencircle.com Email: info@greencircle.com Contact: +966594107307

Construction Execution:

- Our construction teams bring blueprints to life, ensuring each solar plant we build meets the highest standards of excellence.

Operations & Maintenance:

- Our commitment to sustainability extends beyond installation, with comprehensive O&M services that guarantee peak performance.

Project & Design:

- Our commitment to sustainability extends beyond installation, with comprehensive O&M services that guarantee peak performance

Civil Infrastructure & Building Construction

Villa construction

Green Circle is a trusted name in villa construction, one of the most popular destinations for building new villas. Green Circle offers tropical living at affordable prices, along with world-class amenities.

- Green Circle construction team can handle projects of all sizes, from small 1-bedroom villas to large resorts and commercial properties.
- They work to the highest specifications, ensuring stunning villas for their clients.
- If you're curious about costs, investment potential, or want to see examples of our work, Green Circle offers free consultations¹.

Masonry Works

Green Circle provides Masonry work in a vital aspect of construction, involving the skilled use of materials like stone, brick, and concrete. Let's delve into the world of masonry services:

Stone masons

Stone masons work with both natural and manufactured stone. They create various installations, including:

- Facades on Homes: Crafted stone exteriors that enhance curb appeal.
- Walls: Beautifully constructed stone walls for both interior and exterior spaces.
- Flooring: Stone flooring that adds elegance to homes and commercial buildings.

Brick Masons

Brick masons specialize in working with brick, whether it's real, manufactured, solid, or veneer. Their meticulous craftsmanship ensures uniform lines and precision.

Common brick installations include:

- Chimneys and Fireplaces: Sturdy brickwork for warmth and aesthetics.
- Columns: Architectural elements that add character.
- Walls and Patios: Durable brick structures for outdoor spaces.

Concrete Masonry

Concrete masons deal with both poured and block concrete.

Their tasks involve leveling, finishing, and managing weather effects as the cement hardens.

Common concrete jobs include:

- Driveways and Sidewalks: Functional pathways around homes.
- House Foundations: The base for stable construction.
- Columns and Walls: Structural elements built with concrete.

Finishing works

Green Circle Provide Finishing work in construction that is the crucial stage where attention shifts to the finer details, ensuring both functionality and aesthetics. Here are some essential aspects of finishing

Plastering and Puttying:

- After constructing walls and ceilings using materials like bricks, Y-tong blocks, plasterboard, or concrete, plastering comes into play.
- Plastering evens out surfaces, corrects imperfections, and creates smooth, geometrically straight walls and ceilings.
- It's the foundation for subsequent finishes like painting, wallpapering, and decorative elements.

Decorative Plasterwork and Mosaics:

- Explore a variety of decorative plasters and mosaics.
- Mineral-based plasters can have rustic textures, with variations in fraction size and depth of tracks.
- These finishes add character and visual appeal to walls and surfaces.

Flooring:

- Skilled workers install hard floorings professionally, including:
- Faience: Ceramic tiles.
- Terracotta: Fired clay tiles.
- Fine Stoneware Tiles: High-quality ceramic tiles.
- Natural Stone Slabs: Durable and elegant.
- Wood Flooring: Adds warmth and style to interiors¹.

Plastering & Painting works

As a construction professional, our expertise in plastering is invaluable. Whether it's interior walls, ceilings, or exterior surfaces, skilled plastering work ensures a smooth and visually appealing finish. If you have any specific projects or details, you'd like to discuss, feel free to share.

Green circle provides you plastering and painting service. Which includes,

- Cement Plaster
- Gypsum Plaster
- Lime Plaster

Painting works

- Surface Preparation
- Choose paint
- Finishing touches

Interlock Tiles & Marble Works

Green Circle is expertise in marble services is commendable. Marble, with its timeless beauty and versatility, graces both residential and commercial spaces. Here are some ways your company can excel in marble craftsmanship:

Precision Marble Installation:

- Flooring:
 - Expertly lay marble tiles or slabs to create stunning floors.
- Countertops and Vanities:
 - Craft elegant kitchen countertops and luxurious bathroom vanities.
- Wall Cladding:
 - Enhance interiors and exteriors with marble wall panels.

Green Circle is expertise in interlock tiles services is commendable. Interlock tiles, also known as paver blocks, play a crucial role in enhancing outdoor spaces. Here's how your company can excel in this field:

Interlock Installation:

- Residential and Commercial Areas:
 - Your team specializes in interlock installation for both homes and commercial spaces.
- Design to Supply:
 - From conceptualizing designs to supplying quality interlock tiles, you cover the entire process.
- Maintenance:
 - Ensuring long-lasting results through proper maintenance.

Types of Interlock Services:

Villa Interlocks:

- Beautify villa exteriors with well-laid interlock tiles.

Website: www.greencircle.com Email: info@greencircle.com Contact: +966594107307

Paver Blocks:

- Create durable driveways and walkways.

Commercial Area Interlocks:

- Enhance public spaces.

Residential and Commercial Tile Works:

- Craft functional and aesthetic flooring.

Interlock Bricks and Concrete Blocks:

- Versatile options for various applications.

Why Choose Your Company?

Skilled Professionals:

- Your technically skilled team collaborates closely with clients, ensuring their best interests are met.

Customer Satisfaction:

- At your company, customer satisfaction is the top priority.

Quality and Expertise:

- You rank high in quality interlock suppliers in Dubai, with expertise in landscaping and swimming pool construction.

One-Stop Destination:

- Clients can rely on you for all their interlock tiles installation needs.

Heavy Foundation Re-Enforcement & Concrete Works

Green Circle Provide you the service of Heavy foundation reinforcement and concrete works that are crucial for ensuring the stability and durability of structures. Here are the essential steps involved in designing and constructing a steel-reinforced 'rebar' concrete slab foundation:

Soil Analysis:

- Conduct a thorough analysis of the soil where the building will stand.
- Understand the soil's bearing capacity, composition, and behavior over time.
- This data informs the thickness and reinforcement requirements of the slab.

Load Calculation:

- Accurately calculate the total load of the building, including its own weight, the weight of occupants and furnishings, and the impact of environmental factors.
- This figure is crucial in deciding the thickness and reinforcement needs of the slab.

Slab Thickness Design:

- Based on the soil analysis and load calculation, determine the slab thickness.
- The slab thickness is critical for the foundation's performance, as it affects the slab's ability to distribute the building load evenly to the ground.
- If the slab is too thin, it may crack under pressure; if too thick, it may be unnecessarily expensive and difficult to construct.

Reinforcement Design:

- Design the reinforcement using steel bars (commonly known as 'rebar') to strengthen the slab and prevent cracking.
- Consider the size, spacing, and arrangement of the rebar to ensure effective integration into the concrete, forming a robust, monolithic structure¹.

Concrete Mix Design:

- Select the specific concrete mixture to be used, considering factors such as strength, durability, and workability.
- Choose a mix that provides the necessary strength while being suitable for the specific construction conditions.

Design Verification:

- Test the concrete slab foundation design under simulated load conditions to ensure it meets necessary performance criteria.
- Identify any potential issues before construction begins.

Construction:

- Execute the final construction based on the approved design.

Electrical Installations & Electrical Infrastructure

Green Circle offer a complete service from feasibility study to conceptual design and installation. We offer electrical engineering services throughout then Dubai and in KSA & USA. We have preferred contract or status for many of the regions high profile clients where we offer longstanding relationships built around our ability to prov ide innovative solutions. We also work closely with design teams as a preferred contract or where we carry out project work specifically to your requirements.

At **Green Circle**, we understand that electrical installations are the backbone of any modern infrastructure. Our dedicated team of certified electricians and engineers is committed to delivering state-of-the-art electrical solutions that power homes, businesses, and communities.

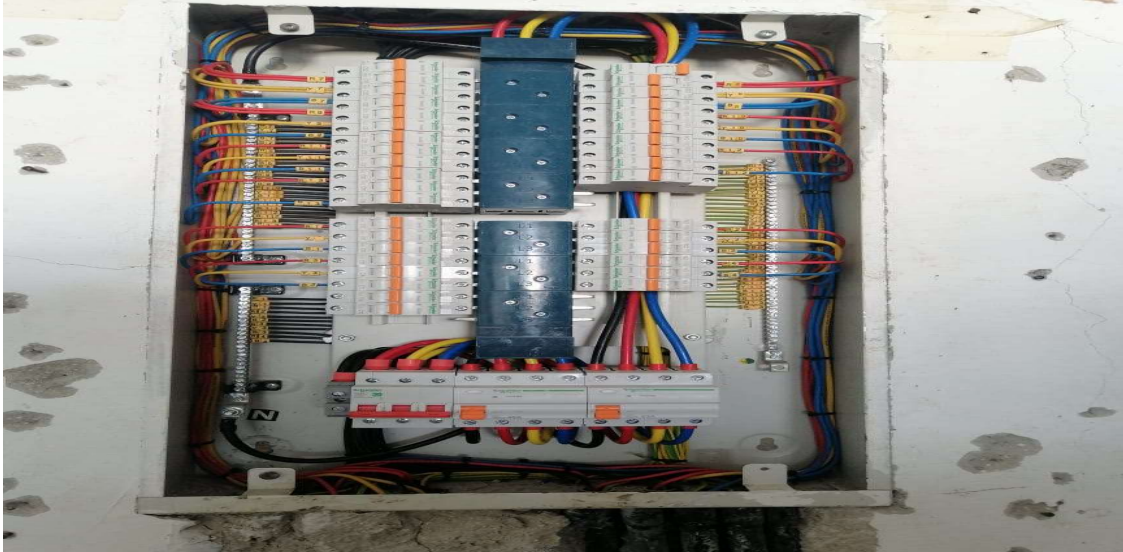

Design & Engineering:

- We create custom electrical designs that meet the unique needs of each project, ensuring efficiency and sustainability.

Installation & Erection:

- Our skilled technicians ensure precise and safe installation of electrical systems, from basic wiring to complex networks.

Website: www.greencircle.com Email: info@greencircle.com Contact: +966594107307

Testing & Commissioning:

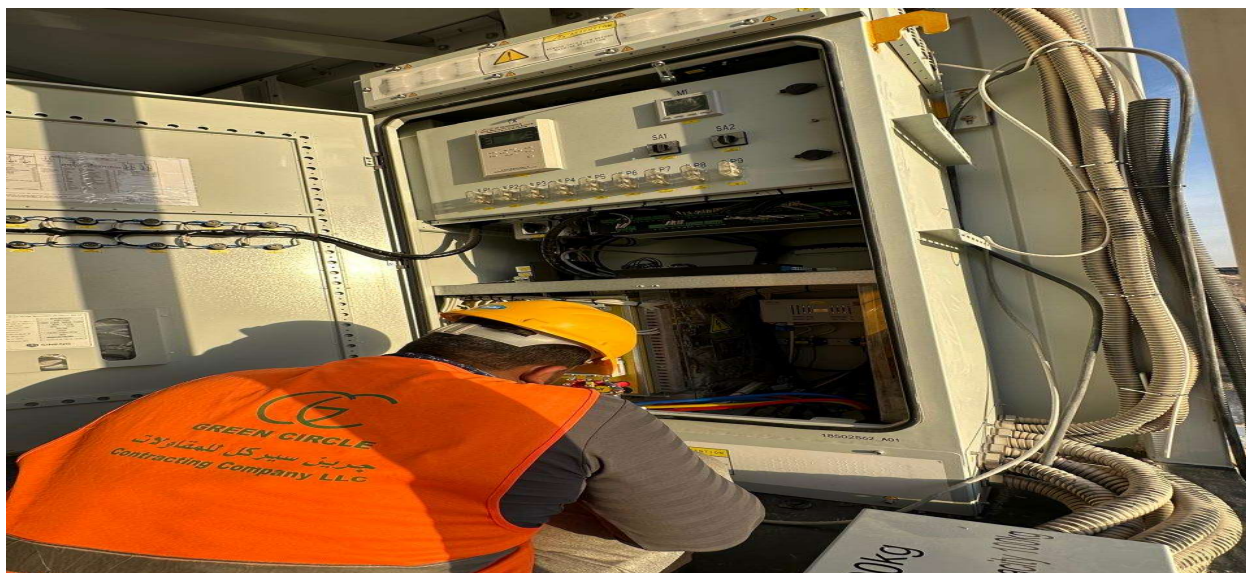

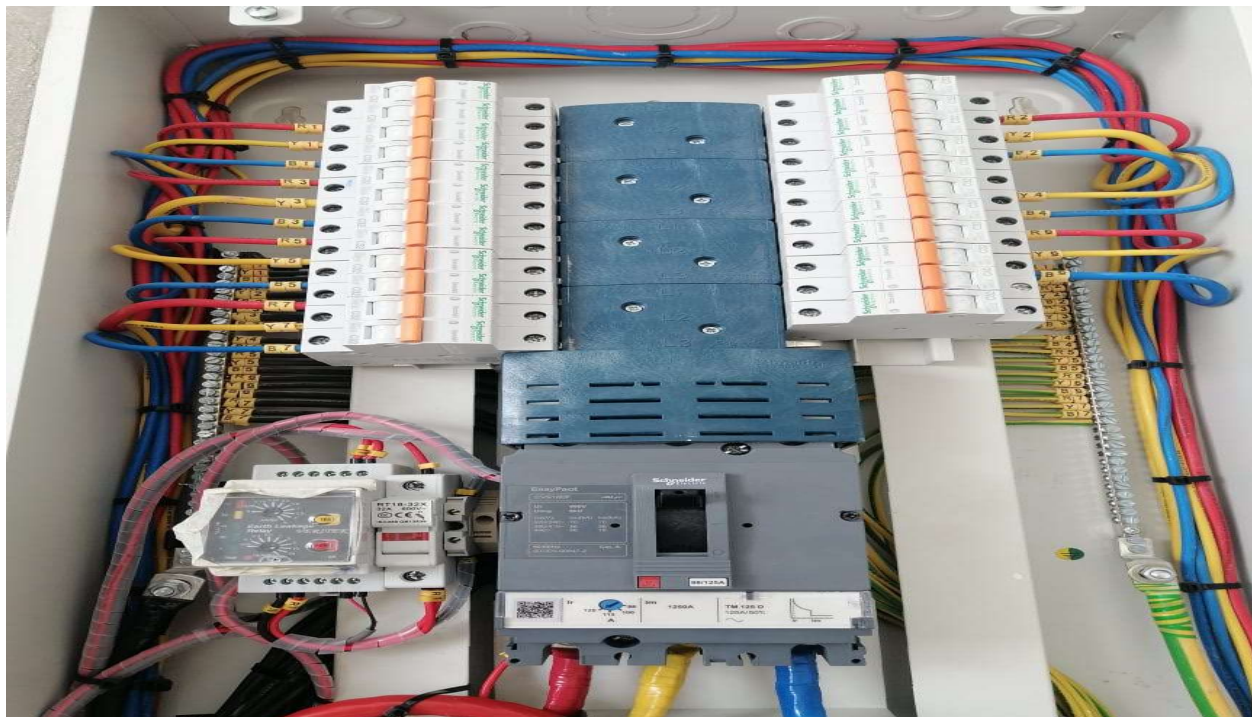

- Rigorous testing protocols are followed to guarantee the reliability and safety of our installations.

Electrical installations

An electrical installation is a group of items of electrical equipment that are permanently electrically connected together and can be supplied with electricity from the works of an electricity entity or from a generating source. An item of electrical equipment may be part of more than 1 electrical installation.

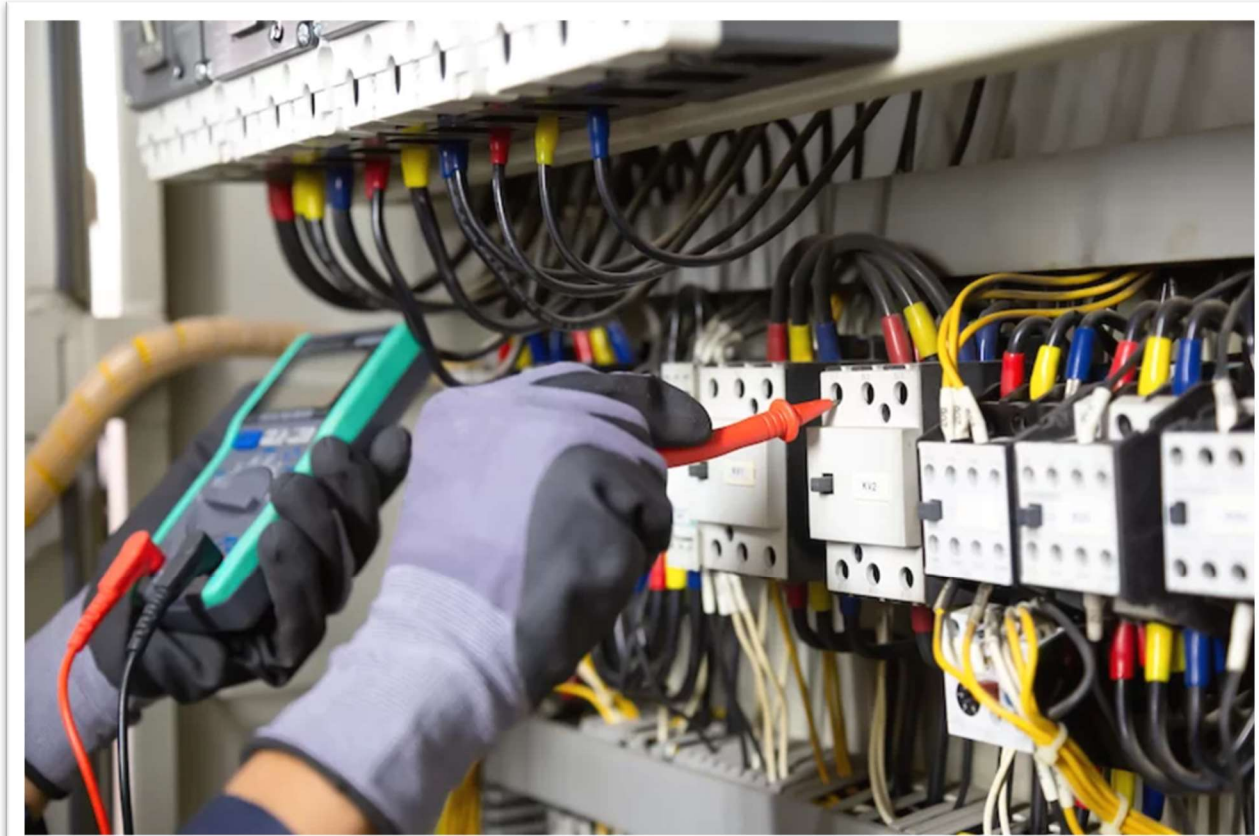

Operation & Maintenance

At Green Circle, we take pride in ensuring the smooth operation and longevity of the systems, equipment, and facilities we manage. Our dedicated O&M team plays a crucial role in maintaining efficiency, safety, and reliability across our operations.

Routine Maintenance:

- Performing regular inspections, preventive maintenance, and corrective actions to keep equipment and systems in optimal condition.
- Addressing minor repairs during shift operations under the guidance of the Operations Supervisor or Maintenance Supervisor.
- Ensuring compliance with safety guidelines and protocols.

Website: www.greencircle.com Email: info@greencircle.com Contact: +966594107307

System Management:

- Monitoring and managing system performance to meet established Service Level Agreements (SLAs) and Operational Level Agreements (OLAs).
 - Developing and implementing plans for system changes and improvements.
 - Tracking and analyzing key maintenance parameters, such as asset utilization, maintenance costs, and schedule compliance.
- ✓ Our commitment to excellence in O&M ensures that your operations run smoothly, efficiently, and safely. Trust Green Circle for reliable and effective maintenance solutions.

MEP & Mechanical Infrastructure

Green Circle is a reputable provider of mechanical services, specializing in a wide range of installations, maintenance, and system management. With a commitment to excellence, we ensure the smooth operation and longevity of critical systems and equipment.

Mechanical Installations

We cover all aspects of mechanical installations, including:

Heat Ventilation & Air Conditioning System (HVAC):

- Air/Water Cooled Chillers, AHUs, FCUs
- VRF Systems, Package Air Conditioning System
- Exhaust/Car Park Ventilation System, Jet Fan System
- Fire Rated/Stainless Steel/GI Duct Works
- Chilled Water Piping System

Plumbing & Drainage System:

- Hot & Cold-Water System
- Deionized Water System, Medical Gas System
- Solar Heater System, Fuel System
- Water Filter System, Sanitary Fixtures & accessories

Fire Alarm & Fire Fighting:

Installation:

Website: www.greenscircle.com Email: info@greenscircle.com Contact: +966594107307

- Our highly-trained technicians design and install complete fire alarm systems tailored to your budget, building specifications, and environment. We consider factors like property type, occupancy, and safety requirements.

Inspection & Testing:

- Regular inspections are crucial for maintaining NFPA-compliant facilities. Our experienced technicians inspect and test various components of your fire alarm system, including control panels, initiating devices, and detectors.

Maintenance:

- Timely maintenance is essential. We provide preventive maintenance, emergency repair services, and replacement equipment. Our precise record-keeping ensures compliance with safety standards.

Monitoring:

- Our fire alarm monitoring solutions keep a vigilant eye on alarm signals 24/7. This helps prevent property loss, reduce false alarms, and dispatch emergency personnel when needed1.

Fire Fighting Systems:

Sprinklers:

- We design and install fire sprinkler systems that activate when water reaches them. These systems provide active fire protection.

Alarms:

- In addition to fire alarms, we offer mass notification systems to alert occupants during emergencies.

Dry Chemical or Wet Systems:

- Depending on your facility's needs, we can install dry chemical or wet fire suppression systems.

Fire Risk Assessment:

- Our experts assess fire risks and recommend suitable protection measures.

Performance-Based Design:

- We tailor fire protection solutions based on your specific requirements.

Smoke Management Design:

- Ensuring proper smoke management is crucial for safety.

Installation of Fire Suppression system:

- We provide fire suppression Like FM200 & NOVAC System (Nitrogen System) .

IT Infrastructure & Computer Networking

Since every organization is different, we'll begin by gathering some information about your goals and operation. Maybe you need full network validation and multi-site design, or maybe you just need a simple VPN setup. Perhaps you're looking for a reliable partner to be your computer networking services company and to provide network troubleshooting and other technical support to your existing team as you scale your business. Whatever the case, Green Circle has the workforce, experience, and resources necessary to cover your requirements.

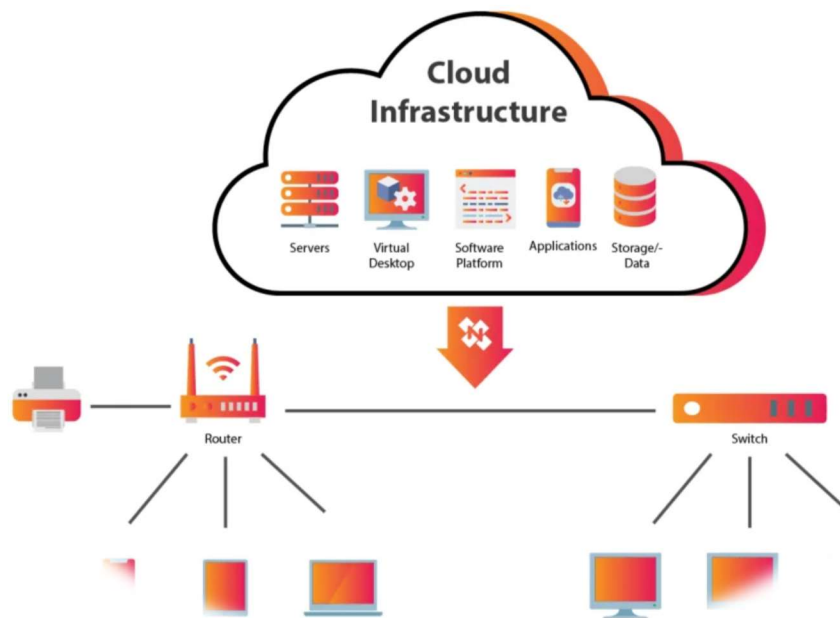

Services We Provide

IT infrastructure

IT infrastructure refers to the various components information technology environments and operations require to maintain performance. Having a strong information technology infrastructure is beneficial for business operations because it improves employee productivity and efficiency as well as helps deliver quality solutions to customers. Implementing proper IT infrastructure is essential for a business to lower the risk of security issues, such as breaches and other challenges related to connectivity and overall productivity. IT Infrastructure have two types

Cloud Infrastructure

Where we put the organization data of different cloud servers.

Traditional Infrastructure

Here in this case, we install our own hardware and create our own data center.

Computer Networking

Green Circle provide you the complete computer networking in big business and small business which includes data components

Hardware requirement

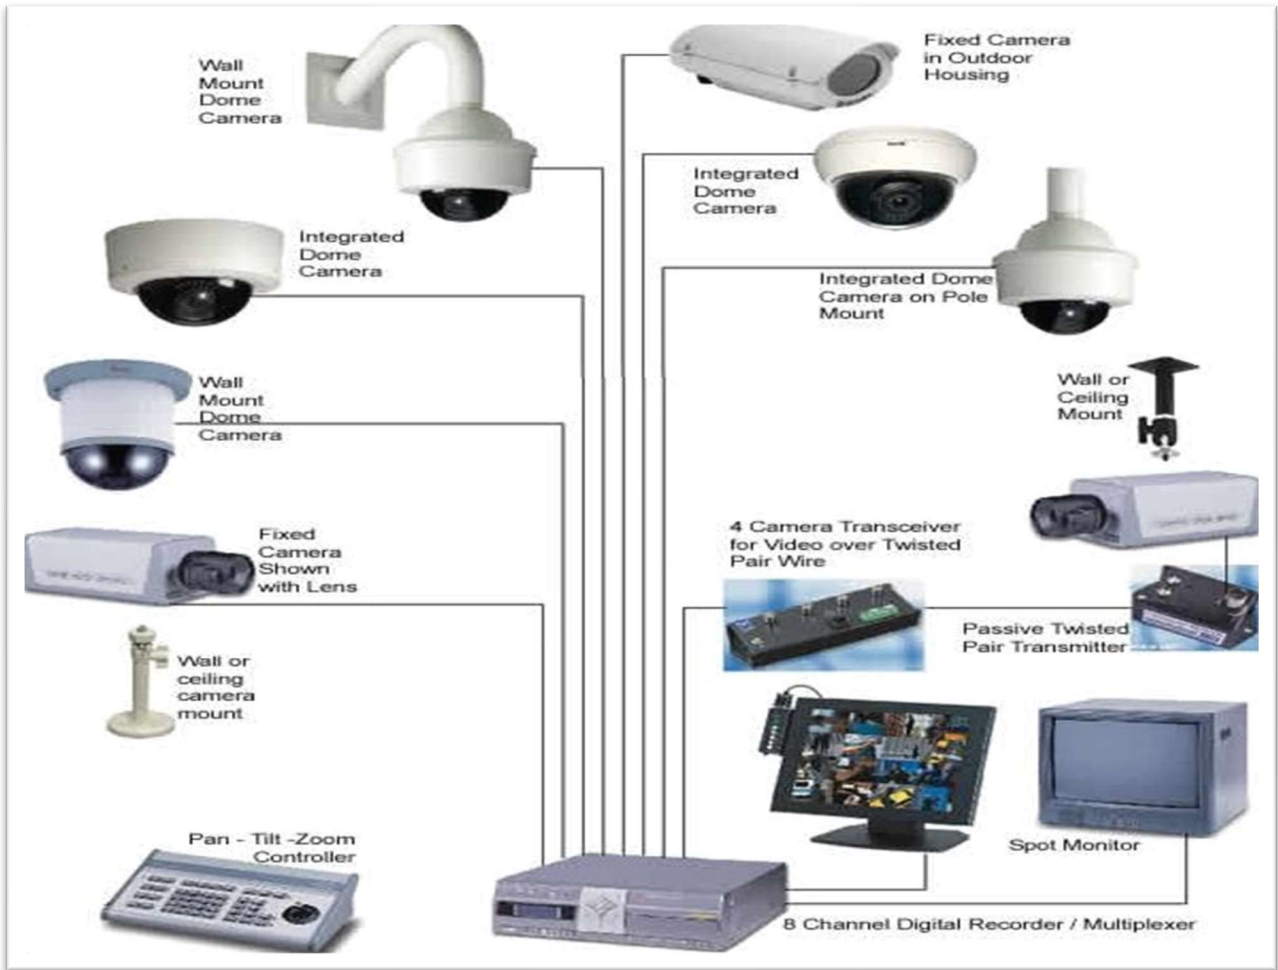

Software requirement

Servers & Networks

CCTV/IP Cams

As a provider of CCTV (Closed-Circuit Television) and IP (Internet Protocol) camera services, we are offering valuable solutions for security and surveillance. Let me share some information about these types of camera systems:

- CCTV Security Cameras
- IP Cameras

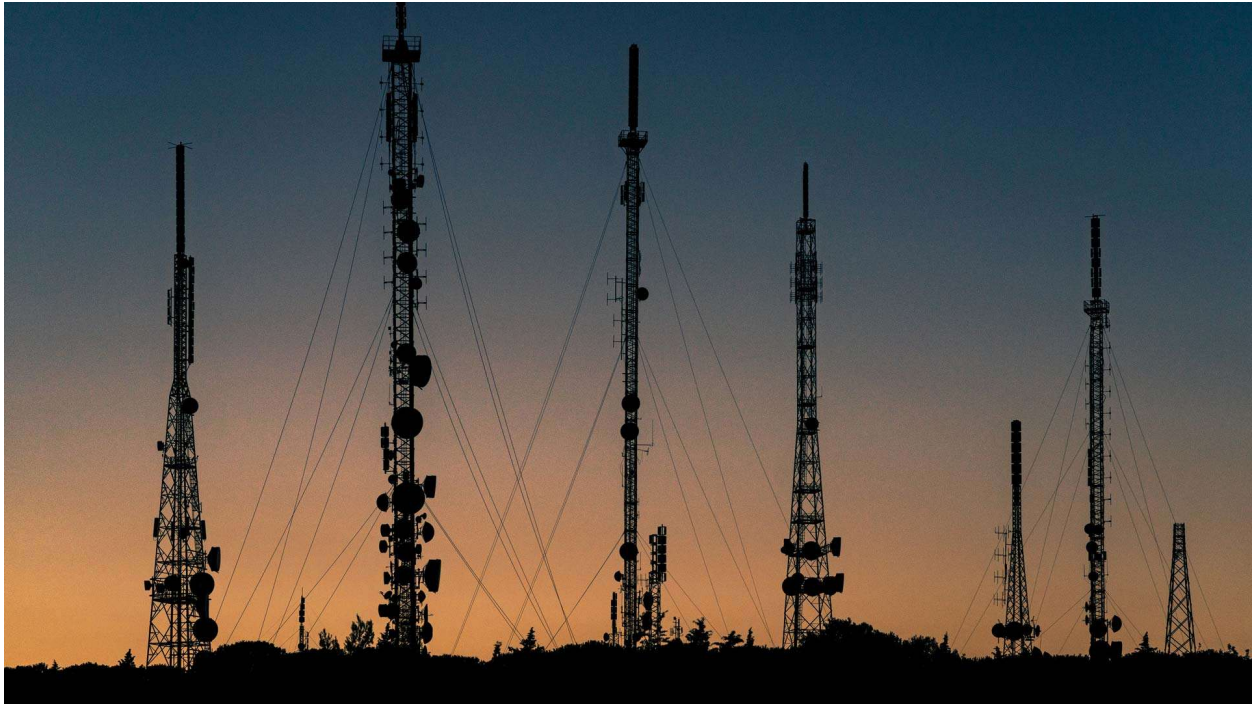

Both CCTV and IP camera systems have their advantages and are chosen based on specific requirements. Whether for business or home use, having reliable surveillance systems enhances security and peace of mind. If you need further assistance or have any questions, feel free to reach out!

Cyber Security

We provide cybersecurity services, that play a crucial role in safeguarding organizations and individuals from digital threats. Here are some key aspects of cybersecurity services:

- **Description**
 - Cybersecurity consultants work with businesses to protect their data and technical systems against cyber-attacks. They provide strategic guidance, risk assessments, and solutions to prevent and remedy hacking, theft, or data breach incidents.

Telecommunication Service

As a provider of telecommunication systems, our role is pivotal in connecting people and enabling efficient communication. Here are some key aspects to consider:

Custom Solutions:

- Tailor your telecommunication systems to meet the specific needs of your clients. Whether it's setting up wireless networks, implementing VoIP (Voice over Internet Protocol) solutions, or designing data centers, understanding your clients' requirements is crucial.

Infrastructure Deployment:

Network Design:

- Plan and design robust communication networks. Consider factors like coverage area, capacity, and scalability.

Installation and Maintenance:

- Deploy and maintain equipment such as antennas, routers, switches, and servers.

Fiber Optics:

- Explore fiber-optic solutions for high-speed data transmission.

Wireless Communication:

Cellular Networks:

- Understand cellular technologies (2G, 3G, 4G, and 5G) and their deployment.

Website: www.greenscircle.com Email: info@greenscircle.com Contact: +966594107307

Wi-Fi Networks:

- Set up Wi-Fi access points for seamless connectivity.

Voice Services:

PABX Systems:

- Install and manage private branch exchange (PABX) systems for voice communication within organizations.

VoIP:

- Implement Voice over IP solutions for cost-effective calling.

Data Services:

Internet Connectivity:

- Provide reliable internet services via DSL, cable, or fiber.

Data Centers:

- Design and manage data centers for hosting servers and cloud services.

Security and Encryption:

Firewalls:

- Secure networks with firewalls and intrusion detection systems.

Encryption:

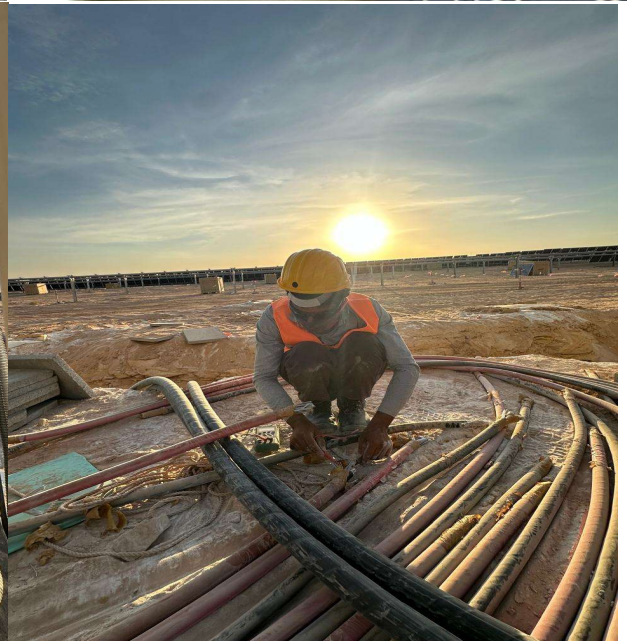

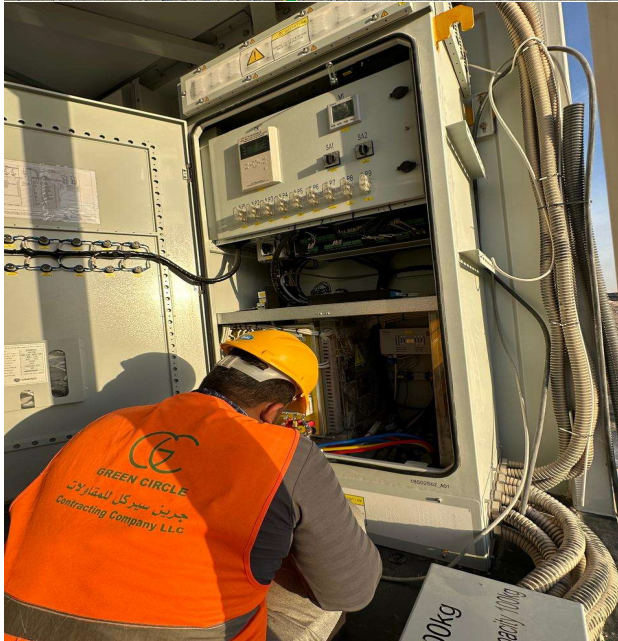

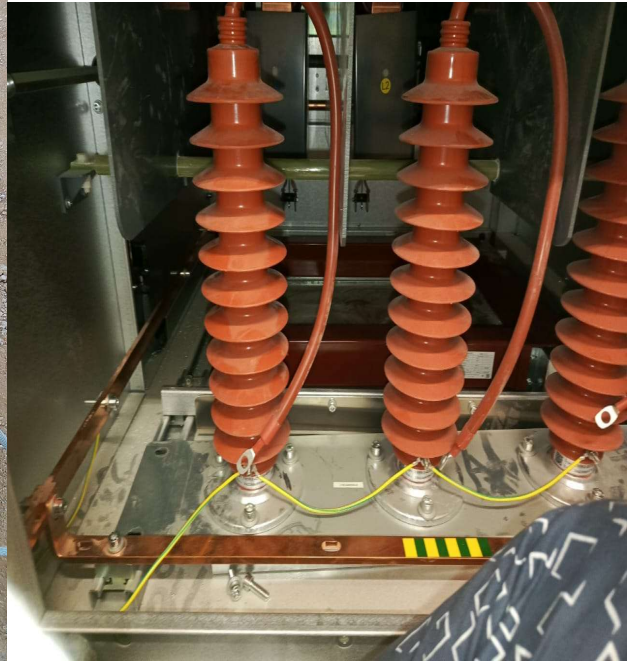

- Ensure data privacy using encryption protocols.
